

SATURDAY, MARCH 25

CONTRIBUTIONS OF ISLAM TO WESTERN CIVILIZATION

Not commonly known important Islamic contributions in mathematics, philosophy, all sciences, medicine, art, architecture, culture, and many, many more.

The apathy towards the astounding achievements of Islamic Societies can at least partly be explained by the indifference—if not hostility between the West and East. Dr. Segal's presentation masterfully fills in the many gaps.

Presented by *The Salaam Network*, a Louisville based interfaith group of educators, peacemakers, and supporters from a wide variety of backgrounds. We believe it is critical to educate the true facts of Islam in the stereotypes and ill-will in today's society.

**THE
SALAAM
NETWORK**

*Striving to make our Beloved
Community of Louisville Whole*

**River Road
Mosque
4007 River
Road,
Louisville**
